PROFESSIONAL SUMMARY

Java backend engineer with 3+ years of experience building and modernizing enterprise banking platforms at TCS. Led migration of TCS BaNCS from monolithic architecture to cloud-native microservices, driving 40%+ improvement in system resilience and 65% reduction in deployment times. Hands-on expertise in Spring Boot, Kafka event-driven architecture, REST API design, and hybrid cloud deployment (AWS/GCP). Banking domain depth in risk management, market data, and payment systems. Seeking backend engineering roles at BFSI GCCs and product companies.

TECHNICAL SKILLS

Languages: Java (17, 21), SQL, Python, Shell Scripting
Frameworks: Spring Boot, Spring Cloud (Gateway, Eureka), Spring Data JPA, REST API Design
DevOps & Cloud: AWS (EC2, S3, Lambda, IAM, VPC, CloudFormation), Docker, Jenkins, Kubernetes, DigitalOcean
Messaging & Data: Apache Kafka, PostgreSQL, H2, PGAdmin, DBeaver
Tools: Git, Maven, IntelliJ IDEA, Postman, Swagger
Practices: Microservices Architecture, Event-Driven Design, CI/CD Automation, Code Review, Agile
Domain: Banking & Financial Services (TCS BaNCS), Risk Management, Market Data, Fund Transfer, Limits Management

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) — Mumbai, India

System Engineer | Oct 2023 – Present | TCS BaNCS — Global Banking Platform

Tech: Java, Spring Boot, Kafka, Spring Cloud, AWS/GCP, Docker, Jenkins

- Directed a team of 5 junior developers in migrating TCS BaNCS from monolithic to microservices architecture
- Designed and implemented distributed, event-driven architecture using Kafka and Spring Cloud, increasing system fault tolerance by 50%
- Led end-to-end lifecycle for 4+ microservices — from architectural design to deployment in hybrid cloud environments (AWS/GCP)
- Engineered inter-module communication using scalable event-driven Kafka architecture for real-time data flow
- Championed adoption of new technologies and agile processes under tight delivery deadlines
- Instituted rigorous code reviews and testing frameworks, reducing production bugs by 27%

Domain modules:

- Risk State Management (RSM)** — Led microservices handling risk state transitions and limit enforcement for banking operations
- Market Info Service** — Built real-time market data distribution and pricing service for downstream consumers
- Limits Management** — Developed credit, trading, and exposure limit validation framework with breach notifications
- QPP (Low-Code Platform)** — Built business logic workflows on TCS QPP accelerating feature delivery across banking modules

Assistant System Engineer Trainee | Oct 2022 – Sep 2023 | TCS BaNCS

- Developed and maintained RESTful APIs for mission-critical banking modules: Fund Transfer, Paper Remittance, Account Balance
- Automated build/release management using Shell Scripts, streamlining workflows for 20+ modules
- Used SQL for database querying and Swagger for comprehensive API documentation

PROJECTS

- High Availability Web App** (AWS CloudFormation, EC2, S3, ALB) — Built HA infrastructure with multi-AZ deployment, auto-scaling, and Application Load Balancer
- Jenkins Multistage Pipeline** (Jenkins, AWS S3, Git) — Implemented automated website deployment with build-triggered CI/CD to AWS S3

CERTIFICATIONS

- AWS Certified Cloud Practitioner — June 2023
- Cloud Engineer Specialization (Google Cloud) — April 2020

EDUCATION

Bachelor of Computer Science and Engineering | Integral University, Lucknow, UP | July 2018 – June 2022
